Le soleil glorieux, la grande icône, la superstar cosmique, le mentor philosophique de l'âme

humaine - le leader mondial, Fang Ruida -----

（Spark Alex Alex Rome 2011v2.3）
God of power
My early morning singing
Through the cloud to reach the supreme
Holy holy holy holy
Compassion and Almighty
Glory and praise
Return to the trinity
Holy holy holy holy
All the saints revere
Put down the golden crown
Surrounding the shore of the crystal sea
Thousands of heavenly army bow down
Ode to the Lord
Where ever before
Forever in billions of springs
Holy holy holy holy
Darkness
Sinner cannot look up
Solemn.
Christianity about the New Year ’ s song. [One year a day] [Happy New Year] Into the new year
Time flows like water, never looking back
Ping An resigns from his old age, and Duo Meng is conservative
Enter the new year and ask the Lord to double the blessing
Enlighten China, all people return to Christ
what! Jesus, ah! Benefactor
I want to praise you forever
Time flows like water, New Year is not wasted
Seeking true knowledge, looking to the Lord Jesus
Worship Sunday and present new poetry
Life grows, truth is free
what! Jesus, ah! Benefactor
I want to praise you forever
The Lord ’ s love is like a stream of water
redemption. Christianity about the New Year ’ s song. Praise the Lord.

Jesus, Mohammed, Sakyamuni, founders of the world's three major religions, billions of believers worldwide. Christmas, Easter, Christmas carols, the Bible and so on are widely spread. Mankind has entered the 21st century, and the world has undergone tremendous changes. History is starting a new page.
There are many great people who affect the world and change the world. From Jesus, Muhammad, Sakyamuni, etc. to the great people of the modern world, such as Newton,

Columbus, Nobel, etc., are praised or worshiped by hundreds of millions of people. Of course, there are no perfect people in the world. Globality, recognition, holiness, and universality are very important. The world ' s 8 billion people have different political, religious, cultural, belief, language, thinking, economic, educational, historical, ethnic, population, environment, etc. Therefore, to evaluate any historical person, it must be comprehensive and accurate, and must have selection criteria People with major controversies and differences can be avoided, but those who are generally agreed by all mankind, such as ancient religious leaders, scientific masters, philosophical thought leaders, literary masters, such as Newton, Einstein, Darwin, Nobel and many more.

Mohammed

Isaac Newton

. Jesus

.Sakyamuni

. Confucius

.Christopher Columbus

.Albert Einstein

Galileo Galileo

.Aristotle

.Charlie Darwin

.Nicholas Copernicus

.George Washington

King Alexander

.Napoleon Bonaparte

.Thomas Edison

Plato

Ludwig von Beethoven

.St. Augustine

.Max Planck

For the above reasons, the fairness and universality of the choice of world leaders are particularly important, especially to avoid people with controversial historical evaluation. Polarity and extremes must be eliminated, otherwise, it will arouse people's resentment and unnecessary arguments. Reality and long-term nature should also be considered. Short-lived characters are also being avoided.

. Great virtues are established, like the high mountains and the sun rising, people feel endless

happiness. Every morning the sun was shining, and La God began his tour of the world. The sun god ... The praises of human blessings came from the earth, and everything in the world praised the great creator La God in the early morning. The sun god in ancient Greek mythology is Helios. According to Hesiod ’ s "The Book of Gods", it is the son of Titans Hupperion and Thea, brother of the moon goddess Selene and goddess Eos It is said that he rides in the sky every day with four horses pulled by fire horses, from east to west, morning and evening, making the world bright. In the myths of later generations, he gradually merged with the light god Apollo. In Rome he was called Sol. Tenzhao the Great God is the ruler of Takamatehara and the Sun Goddess in Japanese mythology. She is regarded as the first ancestor of the Emperor of Japan today and the highest deity of Shintoism. Quoted from "Wikipedia"
As mentioned above, we can see the great influence and historical inheritance of the sun god, and the human admiration and worship of the sun god. From pure natural science research, the giant of the sun
How important it is for all mankind on earth.
Of course, science belongs to science, myth belongs to myth, and the two cannot be compatible. Today ’ s world is not a mythological world in the age of ancient ignorance, but a world of science, spaceships, computers, genetic engineering, and atomic energy that opened up in the ancestors. Therefore, people praise the sun, sing the sun, and have new ideas. It is commendable.
,

Fang Ruida-world-famous scientist, philosopher, thinker, writer, sociologist, astronomer, religious scientist, poet, inventor. Fang Ruida was born in Shanghai in 1950. He used the names Fangda, Yu, Yu, Lu Yu, Fang Ruida, Tang Haijiang, Xu Guokai, Gu Linyi (alias, pseudonym, etc.). In the early years of studying and researching lectures in Europe, the United States, Russia, and other countries, he used English pseudonyms, such as the

pen names of “Smith” and “FD Smith,” and he mainly wrote articles under pseudonyms. Do not use this pen name. Traditionally, he mostly uses other pen names. Fangda and Fang Ruida are the most used ones and they are still using it. Most people in the world use Fang Ruida as their

name. Most of the works written by Fang Rui Da are named after this, and there are few "Smith" signatures among them. Many people also rarely know that his English pen name is "Smith." Fang Ruida used this name occasionally in social studies, research, or commercial work in Europe, the United States, Russia, Japan, Britain, France, Germany, Australia, and other countries, mainly socializing or writing. He has many colleagues and friends all over the world, including Europe, Asia, Africa, Latin America, Australia, and others. His English name is just a kind of hobby or whim. Because, writing essays and writing articles, scientific exchanges, and academic exchanges often use English as a language. Therefo re, he used Smith's pseudonym. This is a pseudonym, not an alias, nothing more. However, some people were very impressed with him, so he often called him "

Smith, born in Shanghai on May 14, 1949. World-renowned physicist, astronomer, cosmologist, astronomer, geologist, biologist, mathematical logician, medical scientist, inventor, philosopher, thinker, sect mathematician, economist, A writer, sociologist, anthropologist, composer, he studied in Europe, America, Russia, Japan, France, France, Desiree, Australia, India, Pakistan, Africa, and other countries, studied lectures, business, etc., once a professor, chief designer, chief engineer, Researcher, consultant, director, dean, principal, factory manager, secretary-general, president, commander-in-chief, chairman, visiting researcher, visiting professor, senior visiting scholar, etc. He is good at learning the civilization, freedom, reason and wisdom of all mankind. He has studied and studied at Shikoku University and the library, and gained great inspiration and knowledge, thus laying the foundation and foundation for him to become a great natural science and philosophical thought leader. At the height of the development of the world and the history of all mankind, advocating freedom and rationality has won praise and appreciation from billions of people around the world. He opposes any extremism and radicalism, he thinks this is the enemy of mankind. He has always advocated freedom, rationality, democracy, equality, and universal love for Pratt and Whitney, and has gained the understanding and consensus of all mankind. The scientific theorem laws he discovered, Jupiter's center distance, easy space-time reverse shear, superrotation superrotation vector theory, superconducting transmission of advanced nerve cell genes, etc., scientific inventions to create space tunnels, high-speed composite power heavy-load rockets, new crowns Biological missile suppression of viral pneumonia, as well as a large number of systematic philosophies and other works, give humans unlimited inspiration and reverie. No matter in developed countries, underdeveloped countries or post-poor countries, regardless of ethnicity, language, skin, religion, culture, wealth, education, he has a strong influence and historical penetration. People widely call it, the glorious sun, the great icon, the superstar of the universe, the philosophical mentor of the human soul-the leader of the world, Fang Ruida. Fang Ruidaism is his most distinctive embodiment. He always upholds equality, justice, freedom and democracy, and opposes and criticizes the genius theory of deification. He said that there is no superman in the world, only the laborers and craftsmen who work hard forever. In front of the great natural universe, anyone is nothing more than a tiny particle of dust. In a world of chaos and disorder, in the era of great transformation and development of all mankind, in the wave of new planetary revolution where mankind has forged into the great natural planet, such a great figure, world leader and human mentor, It is no accident. He resolutely opposed and criticized all forms of extremism and remoteness, far beyond the boundaries of nations, languages, races, nations and religions, and became the glory

of all mankind's freedom and rationality, just like the great sun. Forever shining on the vast earth of mankind and the planetary world in sight, this is where he is eternal, and is also the root of his incomparably powerful and invincible ---- because it draws the great wisdom and civilization of all mankind Therefore, the invincibility is always invincible. Naturalists are the most rigorous and realistic. Its broadness and rationality are praised by billions of people. In front of him, we appeared very immature and at a loss. Fang Ruida has systematically studied various knowledge, including religious classics, and nearly 25 languages in the world. He believes that in this way, true knowledge and the true meaning of all human civilization can be obtained. He deserves to be a citizen of the world. The most famous words in Fang Ruida ' s famous quotes and speeches: " The world and human history are not always big gardens with flowers. On the contrary, stumps and leaves, weeds and vines can be seen everywhere, and humans need to constantly remove and modify them. " . "The history of the entire humankind is nothing more than a gradual and very slow transition from primitive natural animalism to the history of neo-liberal rationality, including the history of the Earth age, the history of the moon, the history of the Mars, or more advanced historical procedures for the evolution of other planetary life species "" In front of the vast natural universe, there are stars and seas everywhere. So, no matter noble and low, nobles, nobles, riches and poverty, no matter how rich or poor, no matter what the history is, no matter the gap between the white horses, they are nothing but clouds of smoke and dust. Immediately. The existence of the soul must depend on the existence of the flesh. Only the most realistic beings are the most real beings. Animals are like this, and all living species cannot escape from this way. "" In the face of the great natural universe, Competition and games are of course lovely and respectable, because anyone will fight as a senior chess creature without exception and fight hard. As everyone knows, these wins and losses are not for the great God and the natural universe. The substantive natural and physical meanings are just a few of the brilliance of passing the guests Game show nothing. "" Ugly and crazy also be without regret avoid making history in it and sometimes as much light and devout created glorious history. " These well-known quotes are full of philosophical wisdom and deep intentions, and contain unlimited content. Everyone is worthy of a deep taste, eats slowly, and has an endless taste. These words of the master, for all mankind, are meaningful and long-lasting. Only by standing at the highest level in history, at the height of freedom and rationality, and at the commanding heights of the washing and repentance of human souls can we appreciate and understand. But it will not be a half-knowledge, get out of context and fall into prejudice and fanaticism. The world is constantly asking questions or speculations about the origin of all things, the power of the universe, the evolution of life and species, the homogeneity and heterogeneity of the solar system and the earth, how the various modalities of the human world have developed, history How to evolve the world

Where does the pattern go, what is the end of the universe ' s evolution, what is the end of the world, the basic form of human society ' s long-term evolution (openness, semi-openness, and closedness), conflicts and competitions between Eastern and Western civilizations, capitalism and society The struggle for doctrine, the moon revolution and the Mars revolution, the evolution and risks of economic globalization, peace and war, freedom and rationality, religion and atheism, confrontation and compromise, etc., urgently need answers and explanations. Against this background of world history, in the era of human beings about to explore the planetary revolution, the cosmic revolution and the great revolution of the moon and Mars, Fang Ruida's

philosophy Fang Ruida's philosophy is unprecedented.

New theories and theories have been created, and this is the natural and inevitable product of history and times. Fang Ruida Philosophy The great significance of Fang Ruida philosophy is first of all that he walked from natural philosophy to social philosophy, rigorous and realistic, avoiding all kinds of biases and extremes

End, full of distinctive characteristics of the times, high-end, universality, freedom, criticism, rational structure, doctrine, reality and practical theoretical unity. Therefore, the charm is endless

and shocks the world. Not only is it useful for the general public and ordinary netizens to read, but also for professionals, senior management, think tank scholars, experts and professors. In particular, it should be noted that Fang Ruida's theory and works are well-known in the world, and more importantly, his identity as a natural scientist, followed by philosophical social scientists, thinkers, religious scientists, learning things, both arts and sciences, galloping, invincible. Strictness, universality, high-end, exemplary, historical, well-known and unquestionable.

He once said that everything comes from the wisdom of all mankind, and he is just a hard worker and a craftsman.
